

**“BEFORE WE SWITCHED TO MBMS
WE COMPARED THEIR
BILLING TECHNOLOGY PLATFORM
TO THE TECHNOLOGY OF THEIR COMPETITORS.
WE’RE GLAD WE DID.”**

Jim Foley

Director Of Business Operations
Medical Imaging Of Lehigh Valley

Resolve,® MBMS’s internally-developed and supported billing software, and Discover,® MBMS’s web-based dashboard reporting tool, together create the fastest, most customizable billing technology platform exclusively for radiology practices. Working together, Resolve® gathers and processes your practice’s billing-related information while Discover® provides endless amounts of easy-to-create dashboards and reports allowing your practice’s leadership to make business management decisions in real-time and predict the future performance of your practice. Accessing your data is fast and easy!

MBMS'S BILLING TECHNOLOGY PLATFORM GROWS AS YOUR PRACTICE GROWS

With over 30 years of "business rules"/logic built directly into our billing technology platform, MBMS enables a maximum level of client customization.

Resolve® is highly scalable.

This scalability enables MBMS to deliver faster claim turnaround times, achieve more reliable transitions, and accept more of your practice's claims at any given time.

Resolve® is intuitive.

Unlike our competitor's software, MBMS's billing technology platform capitalizes on its intuitiveness to tailor critical solutions exclusively for radiology practices. Using the appropriate level of automation and continuous auditing ensures all your practice's charges and payments are always accounted for, translating into accurate and prompt payments for the reads you've completed each day, every month, and year over year.

Resolve® is customizable.

Every radiology practice is unique. MBMS is able to tailor its solutions - billing technology platform, processes - to meet the needs of any practice across the country. We call this combination of flexible technology, industry-leading process, and indelible culture of teamwork TeamTechnology®.

Resolve® can "communicate" with other systems and platforms.

This ability, in part, created an opportunity for MBMS to establish a unique partnership with a leading business intelligence and analytics company. This collaboration led to the creation of Discover®, our web-based dashboard reporting tool.

With Discover®, you can produce key reports such as accounts receivable, cash flow, denial management, or productivity, and all can be generated at the touch of a button. Your practice will have unlimited access to drill down into your data to analyze specific trends and better understand factors impacting your practice. Just a few clicks generate details by CPT code, physician, modality, insurance type, patient type, referring physician, or site. Users can export this information to an Excel spreadsheet or even automatically email reports of critical data to whomever they choose. MBMS can also create restrictions on an individual user level to protect sensitive data and ensure only those responsible can access the data. See Discover's® value first-hand by scheduling your no-obligation demonstration today!
